## Bond market updates to be aired on radio BFM

BOND Pricing Agency Malaysia Sdn Bhd (BPA) is providing regular updates on the local bond market to the investing public via its collaboration with business radio station BFM 89.9.

The investing public will have

access to regular information on the performance and activities in the bond market, delivered in a format akin to those on equities market.

The reports will be broadcast at 12.55pm and 6.45pm each busi-

ness day, according to a joint statement by BPA and BFM.

"One of our main objective is to create awareness and educate the public on the bond market. With this collaboration, we have expanded our reach to listeners

from all walks of life," BPA CEO Meor Amri Meor Ayob said in a press release last week.

According to BFM, this is the first time bond market information is available via the airwaves, the statement added.
